

Ways to Increase COVID-19 Vaccination

July 1, 2021

- **Request a free COVID-19 mobile clinic**

Free mobile on-site clinics and vaccination services are available for employers, schools, community and faith-based organizations, and other groups. You just need to provide the space.

- **Find a clinic**

Visit VaxFinder.mass.gov to locate one of 900 vaccination sites across the Commonwealth.

- **Get vaccinated at home**

Call the In-Home Vaccination Line at 833-983-0485 to schedule a free in-home vaccination.

- **Invite an expert to answer questions at a meeting**

Email VaccineEquityInitiative@mass.gov for help connecting to a clinical expert (e.g. infectious disease, allergist and/or maternal health physician) or complete this form to invite a DPH vaccine ambassador (public health professionals experienced in community settings).

- **Share education and awareness materials**

Use videos, flyers, and graphics, available in 10 languages, to help build trust in vaccine safety and efficacy.

- **Get assistance with transportation and more**

Services and assistance are available including transportation to and from appointments, translation services, mobility assistance, and more. Email VaccineEquityInitiative@mass.gov for more information.

- **Promote the VaxMillions Giveaway**

People who are fully vaccinated can register for the VaxMillions Giveaway for a chance to win \$1 million or a college scholarship.

- **Paid sick leave for vaccination**

The COVID-19 Temporary Emergency Paid Sick Leave Program requires employers to make paid leave time available to Massachusetts employees for COVID-related illnesses, quarantine, and vaccinations, and they may apply for state reimbursement. Federal tax credits are also available to small- and medium-sized businesses offering employees paid sick and family leave. Learn more at treasury.gov. **Employees:** ask about paid sick time at your place of work.
